05/20

### Principal Purposes

- Protecting and enhancing the natural environment, or a significant aspect of the natural environment and public health;
- Providing information or educating, or the carrying on of research, about the natural environment including but not limited to genetically engineered organisms in food, farming and cloning; and
- Informing the community about any matters arising from the development of gene technologies and the use of their products.

### Vision

GeneEthics envisages a safer, more equitable and more sustainable GM-free society.

### Mission

GeneEthics is a non-profit educational network of citizens and kindred groups. We want the precautionary principle, scientific evidence and the law rigorously applied to all proposed uses of genetic manipulation (GM) technologies and their products.

GeneEthics generates and distributes accurate information and analysis on the ethical, environmental, social and economic impacts of GM. Our education programs critically assess GM for the public, policy-makers and interest groups.

### Benefits of membership

- Right to speak and cast one vote at Annual General Meetings, in person or by proxy
- Regular newsletters and updates by email, facebook and website
- Notifications of government and other inquiries and policy processes
- Invitations to forums and events
- Publicity for your group's campaigns and events
- Links to your website, for groups
