Vision

Gene Ethics envisages a safer, more equitable and more sustainable GM-free society.

Mission

Gene Ethics is a non-profit educational network of citizens and kindred groups. We want the precautionary principle, scientific evidence and the law rigorously applied to all proposed uses of genetic manipulation (GM) technologies and their products.

Gene Ethics generates and distributes accurate information and analysis on the ethical, environmental, social and economic impacts of GM. Our education programs critically assess GM for the public, policy-makers and interest groups.

Benefits of membership

- Right to speak and cast one vote at Annual General Meetings, in person or by proxy
- Regular newsletters and updates by email, facebook and website
- Notifications of government and other inquiries and policy processes
- Invitations to forums and events
- Publicity for your group's campaigns and events
- Links to your website, for groups
